## Project Newsletter Issue 014 | January 2020

### Welcome

We returned to the site after the Christmas break in readiness for a busy and productive year. We offer you all our best wishes for 2020.

In our last Newsletter in October we advised that Façade installation would start on the upper levels, and that roof works and internal fit-out would commence.

All of these works are underway and will continue throughout the period.

### Construction Liaison Group

The most recent Construction Liaison Group (CLG) meeting was held on 11th December and was well attended by local resident and business groups.

The next CLG meeting is scheduled for March 2020. For more information please contact Soundings via the project email on page two of the newsletter.

## Key Dates

### March 2020

Basement Excavation  
Completes

Next CLG

## Construction Update

Possible external works in Belgravia by UKPN to bring additional power to the new development. This will be carried out over the coming months in small sections, programmed to complete by February 2020. We are in discussion with UKPN to understand their programme and logistics plan.

Sewer connections will start underground in Halkin Street and Grosvenor Crescent. This will not affect either roads or footpaths, although there are no confirmed dates as yet.

No road closures are planned over the next two months.

### Upcoming Activities

- Basement bulk excavation will be completed in March 2020; therefore, the muck-away lorries will reduce.
- Lower level basement slabs and underground drainage in progress – completion in summer 2020.
- Cladding works to the outside of the building during the period.
- Roofing works are in progress; during this period the majority of these works will be waterproofing
- Internally, hotel guest room fit-out is in progress and will continue throughout 2020.
- Tower cranes will remain in place for most of 2020;
- UKPN excavation works in Halkin Street and Grosvenor Crescent will probably start in February or March.
- Façade installation will continue to all elevations
- Blockwork walls will be constructed in Basement levels B1 and B2
